Lowrance elite 7 ti update instructions

Keep updated with the latest software updates More efficient product support Updates about new products, promotions and events Yes, I want to register No, I'll do this another time New software is available that brings new, Genesis Live onscreen mapping to the touchscreens of HDS Carbon, HDS Gen3 and Elite Ti fish finder/chartplotters. The upgrade also includes smartphone notifications for HDS Carbon and enhanced engine integration for Carbon, Gen3 and Elite Ti. Genesis Live mapping Smartphone notifications* Yamaha Integration (Phase 2) Evinrude Engine Integratio Fusion Ethernet Support* *HDS Carbon only Update the mapping of your favorite fishing spot or map unmapped areas with 1/2-foot contours - in real time - on the screen of your fish finder/chartplotter with C-MAP Genesis Live. Genesis Live uses digital depth to create high-definition maps featuring precise detail down to 1/2-foot contours. Target key fishing areas with Genesis Live maps, which make it easy to find areas where fish like to hide, like drop-offs, point, ditches and more. Genesis Live maps are saved to a microSD card for continuous use. Never miss an important text or call with the software notifications included in the NOS 18.2 software update. Turn off phone notifications for uninterrupted fishing, or leave them on to receive popup notifications on the screen of your HDS Carbon display. *HDS Carbon only This release gives Elite Ti 12-, 9- and 7-inch models, the same level of outboard engine integration as the HDS series displays, and adds additional engine integration features to HDS Carbon and HDS Gen3 displays. New software has also been released for our high performance sonar modules, including StructureScan® 3D and SonarHub™. This release aligns the module software with the new 18.2 release for HDS Carbon and HDS Gen3 displays. Download Software Update Today
